Attachments: FormaldehydeTRdraftTechEdit032317_b.docx; FormaldehydeTRdraftTechEdit032317_a.docx; Formaldehyde Edit Request Form.pdf; Formaldehyde Graphics Support.pdf

Hello,

Attached is Formaldehyde part a and b for a mechanical edit to include a read through checking for grammar, punctuation, typos, consistency, formatting, table/figure callout citations, etc., plus a review for clarity.

- Please ignore the comment bubbles (and leave them in), unless they contain reference information useful for HERO linking. Any track changes missed can be accepted.
- The Appendices are not being tech edited simultaneously, so highlight those callouts, that would be helpful for the next round (i.e. we can add more clarification in terms of sections, etc., once the tech edit on the Appendices is completed).
- The authors want to be instructed on how to insert updated figures, tables, and headers into the tech edited version without breaking any links, etc.

Please contact the authors Andrew Kraft and Barbara Glenn before doing any major reformatting. This draft of the document does not have to be perfect, so you may take short cuts if necessary, we can update other items during the next round.

Please give us a date on when you will have the document completed.

Thank you,

Taukecha Cunningham
